

Tbilisi Seasonal Pest Calendar

A planning aid for inspections - not a report of pest prevalence in Tbilisi.

Spring

☐ Inspect screens, pipe gaps, drains and recurring moisture.

☐ Start monitoring before choosing a treatment.

Summer

☐ Contain food and waste; remove avoidable standing water.

☐ Check pet-resting areas, balconies and shared spaces.

Autumn

☐ Review door gaps, service penetrations and storage.

☐ Record occasional invaders before sealing routes.

Winter

☐ Continue indoor checks for cockroaches, bed bugs and stored-product pests.

☐ Look for fresh rodent evidence in protected areas.
